PROFESSIONAL SUMMARY

Flutter Developer with 2+ years of hands-on experience building and deploying 10+ cross-platform mobile applications, currently expanding into native iOS development with SwiftUI (iOS 18). Specialized in GetX state management for high-performance reactive UI, dynamic routing, and clean dependency injection. Proficient in clean architecture, Firebase integration, and RESTful APIs, with a proven track record of maintaining a live enterprise B2B platform on the Google Play Store.

TECHNICAL SKILLS

Languages: Dart, Swift, JavaScript, HTML/CSS

Frameworks: Flutter, SwiftUI (iOS 18)

State Management: GetX, BLoC, Riverpod

APIs & Backend: REST APIs, Google Maps SDK, Firebase (Auth, Firestore, Storage)

Databases & Tools: SQLite, SQL, Git, GitHub, VS Code, Android Studio, Xcode

Architecture & Concepts: Clean Architecture, MVVM, OOP, Null Safety, App Deployment

PROFESSIONAL EXPERIENCE

Jr. Flutter Developer

Feb 2025 – Present

Spark Tech Agency (Full-time) — On-site, Bangladesh

- Contribute actively to cross-platform mobile app development using Flutter and GetX for reactive state management and scalable clean architecture.
- Collaborate with cross-functional teams to build production-level features including robust API integrations, Firebase backend services, and pixel-perfect responsive UIs.
- Apply mobile development best practices to ensure code maintainability, clean structure, and optimal performance.

Flutter Developer

Dec 2024 – Feb 2025 (3 mos)

Selefe — On-site, Dhaka, Bangladesh

- Built and optimized mobile application features using Flutter, adhering to clean architecture and modern development standards.
- Applied core computer science fundamentals and problem-solving techniques to resolve technical issues in a live production app environment.

KEY PROJECTS

The Wolf Pack — B2B Sales Performance App

[Live on Google Play Store](#)

Client: Wolf Pack Group FZCO

Tech: Flutter, Firebase, GetX, BLoC, REST API

- Engineered and deployed a full-scale B2B sales application currently serving enterprise users in production.
- Built a real-time performance dashboard tracking sales metrics, goals, and pipelines using GetX reactive controllers for instant data binding.
- Designed a gamified system featuring Champions, Gold & Silver Leagues with real-time leaderboards using GetX state management.
- Structured the entire codebase with GetX dependency injection and named routing for clean, modular architecture.

SwiftRide — Ride Sharing App

Ready for Production

Tech: Flutter, Google Maps API, Firebase, GetX, Payment Gateway

- Developed a dual-panel application tailored for Drivers and Passengers with fully independent booking and dynamic routing flows.
- Integrated Google Maps SDK featuring real-time location display, live vehicle tracking, and dynamic fare computation.

- Implemented end-to-end user authentication, profile management, and payment gateway integration.

Jiu Jitsu — Martial Arts Community App

[Live on App Store & Play Store](#)

Tech: Flutter, Firebase, Google Maps SDK, GetX, BLoC

- Built an interactive gym location map with dynamic search, workout schedules, and detailed facility amenities.
- Developed customized athlete profiles for tracking belt promotions, competition performance, and event registrations.

EDUCATION

B.Sc. in Computer Science & Engineering

2019 – 2024

Green University of Bangladesh

Relevant coursework: OOP, Data Structures, DBMS

CERTIFICATIONS & LANGUAGES

- Mobile App Development with Flutter (6 Months) — Udemy
- SwiftUI Masterclass (iOS 18) — Udemy (In Progress)
- Languages: Bengali (Native), English (Professional)

Open to Flutter & iOS Opportunities — Available for Freelance & Full-time Roles
